## COMPANY OVERVIEW

Creative Visions, LLC is a cybersecurity-focused federal contractor delivering hands-on operational support across security engineering, continuous monitoring, and compliance-driven environments. We support agencies that require real-time visibility into their cybersecurity posture, disciplined execution of the Risk Management Framework (RMF), and sustained operations across hybrid infrastructures including on-premises, cloud, and enterprise systems. We integrate directly into government environments to operate, maintain, and improve cybersecurity capabilities that support mission continuity and regulatory compliance.

## CORE CAPABILITIES

- Cybersecurity Operations & Security Engineering
- Continuous Diagnostics & Mitigation (CDM) Support
- SIEM Engineering, Security Monitoring & Incident Response
- Vulnerability Management & Risk Prioritization
- RMF Execution, ATO Support & Continuous Monitoring
- FISMA Compliance, Reporting & Data Validation
- Cybersecurity Tool Integration (SIEM, EDR, NDR, CSPM)
- Security Data Analysis, Reporting & Dashboarding

## RELEVANT EXPERIENCE

### Department of Homeland Security (DHS) – CDM DEFEND Program

Supports enterprise vulnerability management and cybersecurity operations across 50,000+ federal assets. Improved enterprise-wide visibility and reduced vulnerability remediation prioritization time by 35% through structured data integration, analysis, and risk-based reporting.

### Bureau of Engraving and Printing (BEP)

Delivered SIEM engineering, SOC support, and continuous monitoring across ~3,500 endpoints in a high-security federal environment. Improved detection accuracy by 40%, enhanced threat visibility, and strengthened incident response through optimized correlation logic and centralized monitoring.

### HHS ASPR (Office of Information Technology)

Responsible for FISMA data call coordination across 20+ system owners, improving data accuracy, reporting consistency, and executive-level visibility into enterprise cybersecurity posture. Developed SOPs and standardized workflows to support repeatable, audit-ready reporting processes.

### Federal RMF / ATO Support (Multiple Agencies)

Supported 30+ system authorizations with a 95% first-pass ATO success rate by implementing structured pre-assessment validation, continuous monitoring integration, and audit-ready documentation aligned with NIST 800-53 and FISMA requirements.

## DIFFERENTIATORS

- Direct operational experience supporting federal cybersecurity programs - not advisory-only services
- Proven ability to improve detection, response, and remediation timelines with measurable results
- Deep experience integrating and operating cybersecurity tools within active environments
- Strong alignment with NIST, FISMA, CDM, and federal reporting requirements
- Lean, responsive team structure capable of rapid integration and execution

## CORPORATE INFORMATION

- **Certifications** – 8(a), WOSB
- **GSA Contract Holder** – 47QTC A25D00E3 (54151S, 54151HACS)
- **FCL** – Top Secret Facility Clearance
- **NAICS Codes** – 541519, 541512
- **UEI** – K1RXJG6MDLA1
- **CAGE Code** – 7FJZ3
